laurareyeslarrosa.github.io/laura-reyes-portfolio

Senior Full Stack Developer with 10+ years of experience engineering scalable, high-performance web applications, specializing in Angular, TypeScript, React, and .NET Core. Proven track record of bridging technical execution with business outcomes by modernizing complex architectures and optimizing user engagement.

Architecture & Modernization: Expert in transforming enterprise legacy systems, designing robust frontend structures using Domain-Driven Design (DDD), and building highly reusable component systems.

Technical Leadership & Impact: Experienced leading high-stakes production migrations (e.g., upgrading multiple portals from Angular 17 to 20), driving technical decision-making, and systematically reducing technical debt.

Engineering Excellence: Champion of clean code, SOLID principles, and automated testing (Unit/Smoke) in Agile environments. Dedicated to fostering team growth through active mentorship and rigorous code reviews.

Professional Experience

Full Stack Developer – Switch Software Solutions | 2020 – 2026

Legacy Modernization & DDD Architecture: Spearheaded the architectural refactoring of a major legacy web portal using Domain-Driven Design (DDD) principles, aligning the codebase with core business logic to drastically improve scalability and long-term maintainability.

Massive Angular Upgrades: Led the high-stakes migration of 5 production portals from Angular 17 to 20; successfully managed breaking changes and dependency conflicts with zero downtime or disruption to parallel development tracks.

Migration Strategy & Risk Mitigation: Designed and executed a robust deployment strategy using isolated branch synchronization, unit testing, and smoke testing to prevent regressions and ensure seamless, secure releases.

Frontend Excellence & UI Refactoring: Redesigned the frontend ecosystem from the ground up using Sass, responsive layouts, and mobile-first methodologies, resulting in measurable improvements in web performance, user engagement, and conversion rates.

Technical Debt Reduction: Systematically eliminated deprecated libraries and optimized package dependencies, significantly reducing technical debt and boosting application load times.

Component Governance & Reuse: Engineered a highly reusable, shared component architecture that streamlined frontend development velocity across teams while ensuring strict UI consistency.

Technical Leadership & Mentoring: Championed engineering excellence by driving technical decision-making, conducting rigorous code reviews, and mentoring team members in clean code and solid frontend practices.

Cross-Functional Collaboration: Partnered closely with UX/UI designers and backend teams to ensure seamless API integration, pixel-perfect layouts, and an optimized end-to-end user experience.

Full Stack Developer – Middle-Soft | 2015 – 2020

Driven React Adoption & Modernization: Proposed and led the technical transition from legacy jQuery/JavaScript to React.js, modernizing the frontend architecture to enhance application performance, maintainability, and development speed.

Architecture & Mentorship: Built the initial React project template/starterkit from scratch and provided hands-on mentorship to the engineering team, facilitating a smooth adoption of modern frontend practices.

Full Stack Engineering: Developed and maintained scalable full stack applications using React.js, C#, .NET Core, PHP, and SQL Server, ensuring high availability and seamless data flow.

API & Service Integration: Designed and implemented robust API integrations and API Gateways to connect backend services with dynamic frontend interfaces using AJAX and JavaScript (ES6+).

UI/UX & Business Alignment: Architected responsive, user-centered interfaces using CSS3 and modern component patterns, closely collaborating with cross-functional Agile teams to align technical solutions with business goals.

Code Quality & Scalability: Applied SOLID principles and Clean Code best practices across .NET and React codebases, reducing technical debt and improving long-term application scalability.

Web & Mobile Developer – Jalumar S.A. | 2014 – 2015

Hybrid Mobile Development: Developed and deployed hybrid mobile and web applications using Apache Cordova and Angular, ensuring cross-platform compatibility and seamless performance.

Advanced CSS & UI Layouts: Designed responsive, modern interfaces using HTML5, CSS3, Flexbox, and Grid, ensuring precise visual layouts and smooth user experiences across multiple device screen sizes.

Mobile Performance Optimization: Spearheaded asset and code optimization strategies, including heavy image compression and text/file minification specifically tailored to ensure high-performing applications on legacy and low-spec mobile devices.

Interactive Frontend Features: Engineered interactive web experiences and game logic, utilizing advanced JavaScript/Angular features for state management and user interaction.

Java Integration: Explored and adapted Java backend concepts to align with frontend Angular development, facilitating smoother data exchange and full-stack understanding.

Web Developer – Bold | 2013 – 2014

Full-Stack Feature Development: Engineered and maintained robust web applications, working across both PHP and .NET backend architectures to deliver high-quality, scalable features.

Database Management & Security Hardening: Spearheaded critical security enhancements, including the implementation of advanced database encryption protocols and updates to safeguard sensitive user data.

UI/UX & Responsive Layouts: Translated visual designs into clean, semantic, and fully responsive UI layouts using CSS3 and JavaScript, ensuring a seamless user experience across different browsers.

Optimization & Bug Fixing: Diagnosed and resolved complex software bugs, significantly improving application stability, query performance, and overall system reliability.

Data Integration & Migration: Managed and optimized relational databases (SQL Server & MySQL), writing efficient queries and ensuring data integrity across legacy application modules.

Tools & Technologies

- Frontend: Angular, TypeScript, JavaScript, React, Redux, HTML5, CSS3, Sass, Less, Responsive Design, Mobile-First Development
- Backend: ASP.NET, .NET, C#, PHP, REST APIs
- Architecture & Best Practices: Domain-Driven Design (DDD), SOLID Principles, Clean Code, Reusable Component Architecture
- Testing & Quality: Unit Testing, Smoke Testing
- Databases: SQL Server, PostgreSQL
- Tools & Methodologies: Git, Jira, Agile/Scrum, CI/CD
- Other: Technical Leadership, Mentoring, UI/UX Collaboration

Education

- Web Design Analyst – Universidad ORT (2014 – 2015)
- IT Analyst – Universidad de la Empresa (2011 – 2013)
- Java & .NET Programming – Universidad de la Empresa (2011 – 2012)

Certifications

- Angular – The Complete Guide (Udemy, 2024–2025)
- React - The Complete Guide (incl. Next.js, Redux) (Udemy, 2024–2026)
- NodeJS: From zero to hero (Udemy, 2025–2026)
- UX Fundamentals (Udemy, 2024)
- Advanced CSS & SASS (Udemy, 2023)
- Clean Code (Udemy, 2023)

Languages

- **Spanish:** Native
- **English:** Advanced / C1 (Fluent conversational and professional proficiency)
